Pegasus Technologies Security and Data Audits

Pegasus Technologies can assist your company with its compliancy and regulatory requirements with its product agnostic approach. Our consultants focus on understanding your business's daily, tactical and strategic goals and objectives for all lines of business / business units and match security solutions that make sense while maintaining a proper balance of security and availability.

Risk Assessment / Analysis by defining and reviewing your exposure to outside and inside vulnerabilities, we will create a program that includes an inventory of your IT assets and a review of your policies and procedures that will prioritize your data security steps that will mitigate identified risks.

Disaster Recovery and Business Continuity Is essential to your company's financial and business reputation. All plans are to help ensure the continued health of your company in the event of unforeseen or difficult circumstances. The need for recovery and continuity can not be overstated; we will work with you to seek productive and manageable goals and templates that should be reviewed practiced and reviewed again to maintain it's usefulness in supporting your organization

Security Design and Implementation have you ever wondered what a hacker looks for in a system? What items lead them to find you and your information? We know and we help companies find those weaknesses. We test your current counter measures and help you secure your systems. Let our team of "Certified Ethical Hackers" help you keep them out.

Regulatory Compliancy Readiness The reality for countless industry specific businesses is that we live in a post MCI, Tyco and Enron world. Companies face auditors with microscopes with respect to how information is used, managed a distributed. Penalties for non-compliance as well as the requirements for compliancy are more stringent then ever. Regulations like The Sarbanes-Oxley Act of 2002, Gramm-Leach-Bliley Act of 1999, Health Insurance Portability and Accountability Act and numerous amendments to the Security and Exchange Commission share on common goal: the security of archived and production data.

Incident Response and Computer Forensics You have been hacked . . . Now what? Was this breach internal or external? Did they get anything of value? Need answers and solutions to these questions and more Pegasus can help. Pegasus can also review your systems and tell you where a likely breach can happen and how to mitigate any potential loss.

Security Policy Development, Standards, Procedures, Baseline security awareness is everyone's business your employee's are your frontline of defense against risk, disaster, hackers, non-compliance and incidents. Do they know what you expect of them? Do they know what to be on the lookout for or report? Assuming and hoping that they will do the right thing puts your organization at risk. We can help your organization, document, train and turn your organization in to a proactive group.

“We match security solutions to business goals and objectives”
